Paths Towards Excellence in Math and Literacy Learning

and

Educating the Young Child Through Music and Movement

Seminar Description

Music and Movement Module

Speakers: Ms. Marla Pabalan and Mrs. Teresa Peralta

Music and Movement Specialists, Keys Grade School and Explorations Preschool

May 23 Music and Movement

May 24 Music and Movement

Studies indicate a positive correlation between music and movement and development in reasoning, memory, math, reading and language learning, particularly for young children. Aside from being highly enjoyable, it is also an essential teaching tool in every classroom. The seminar will tackle the benefits of music and movement, train the teachers to incorporate music and movement throughout the day to achieve various learning goals and provide scores of examples that teachers can readily use to enrich their curriculum.

Math Module

Speaker: Ms. Didi Manahan, M.S. Ed., Bank Street College of Education, New York City, U.S.A

May 25 Numbers

May 26 Geometry

The seminar characterizes high quality math teaching vs. low quality math teaching. It provides an overview of the mathematical ideas that are appropriate for preschool and the early grades. The seminar will focus on two core areas that are important for mathematical learning in preschool and the later grades: Number and Geometry. Finally, it will provide an overview of children's learning in these two areas from 2-6 years old and several examples of how instruction can support progress.

Literacy Module

Speaker: Mrs. Benilda Ancheta-Veloso, M.S. Ed., Bank Street College of Education, New York City, U.S.A

May 27 Literacy

This seminar-workshop aims to provide suggestions that will support teachers as they seek to build strong literacy communities. In this seminar workshop, participants will focus on enhancing their students' early literacy in the classroom. This includes building phonological awareness; learning about print while working with letters, words and beginning links with phonemic awareness and using children's literature in a more purposeful way.
